- (e) Night blindness need not be tested as a routine, but only in special cases. No standard test for testing of night blindness or dark adaptation is prescribed. It is left at the discretion of the Medical Board to improvise such rough test, e.g. recording of visual acuity with reduced illumination or by making the candidate recognize various objects in a darkened room after he/she has been there for 20 to 30 minutes. Candidate's own statements should not always be relied upon but they should be given due consideration.
- (2) Ocular conditions other than visual acuity.—The ocular conditions or diseases which should be considered as a disqualification are as follows:-
